HIGH PRECISION MACHINES FOR CAN MANUFACTURING

PARTER PAV 800 / PAV 1200

This machine is working with an outside parting rail and inside mandrels and is suitable for parting prescored welded can bodies. It has especially been built for the use with very thin double reduced tinplate in DR 8 quality. The machine has 6 heads, and its vertical design allows the installation of an inexpensive conveyor through parter, necker, flanger and beader.

Its essential characteristics are the consistently precise manufactured container, the compact design, the very smooth running without vibrations and the simple handling. For further information please see the technical details.

Planning and designing by modern CAD technology.

PLC controlled production units for high precision tool manufacturing.

*Control panel

TECHNICAL DETAILS PAV 800 / PAV 1200

- by-pass for cans which are not parted
- high flexibility thanks to short change-over times for diameter and height
- excellent accessibility
- central oil lubrication system
- high flexibility and space saving setup thanks to electronic synchronisation
- electronic control of machine functions
- electronic speed regulation
- declaration of CE-conformity for machine and control

STATE OF THE ART DESIGN

TO INSURE HIGH PRECISION MANUFACTURING

| TECHNICAL DATA | | PAV 800 | PAV 1200 |
|--------------------------|------|---------|----------|
| diameter range | mm | 52-105 | 52-105 |
| parted body height range | mm | 35-140 | 35-140 |
| capacity per minute in | cans | 400 | 600 |
| capacity per minute out | cans | 800 | 1200 |
| connected load | kW | 4 | 4 |

subject to alterations

GERMANN+FREI AG
ADVANCED TECHNOLOGY

WITH NEW IDEAS TO INSURE SUCCESS

**NEW COMBINATION POSSIBILITIES OF
PRODUCTION UNITS MOST SUITABLE FOR
CUSTOMER'S REQUIREMENT**

*Parting and necking for
up to 1200 cpm*

*Combined
Spin Flanger/Beader
SBV 400.*

*Aerosol can line for
up to 750 cpm.*
